Summary — Full-stack developer creating modern AI and SaaS applications using Next.js and the latest tools.

Skills

Automation GitHub Actions, Vercel CI/CD, Docker
Cloud Vercel, Netlify, Appwrite, Supabase

Languages Typescript, Javascript, Python, PHP, SQL

Experience

RapidWere Software

Jan 2022 – Feb 2023

Full Stack Developer

- Developed and optimized full-stack web applications using Next.js and React, focusing on API integration, performance tuning, and improving the overall user experience.
- Built AI-powered SaaS features using tools like Vapi, Gemini API, and Supabase, including voice-based interactions, credit-based access control, and user role management.
- Deployed and maintained projects using platforms like Vercel, Railway, and GitHub Actions for CI/CD.

IrvinTech Solution

Dec 2023 – Nov 2024

Full Stack Developer

- Built and maintained responsive, high-performance web applications using React.js, Next.js, Tailwind CSS, and recently expanded into React Native for mobile development, focusing on seamless UX, performance, and cross-platform consistency.
- Worked on backend development using Express.js and PHP, Laravel focusing on API integration, database management, and improving overall system scalability and efficiency.
- Collaborated on an internal Web Development Taskforce to design and deliver scalable React.js and Next.js applications tailored for internal tools and team workflows.
- Designed and delivered AI-enabled SaaS platforms with voice interfaces, usage-based access plans, and scalable user management, leveraging Vapi, Gemini API, and Supabase, Appwrite.

Education

State University

Bachelor's in Computer Science (Second Semester)

Aptech Computer Education

Software Engineering Diploma (Final Year – In Progress)

Projects

AI Code Generator with Live Preview

Jan 2025 – Present

- Developed an AI-powered code generation platform using Next.js, Gemini API, and Sandpack, enabling users to upload images and receive live code previews.
- Implemented real-time rendering with Sandpack and added image-to-code conversion, allowing users to visually test and copy AI-generated components.
- Live Preview

Nova Chat

March 2025 – Present

- Transform your communication with ChatNova, the AI assistant that understands you
- Tech: Next.js, TypeScript, Gemini
- Live Preview

MediaFlow – AI-Powered Image Effects Platform

May 2025 – Present

- Built an AI-driven image enhancement and transformation tool using Next.js (TypeScript), Tailwind CSS, shadcn/ui, and Cloudinary, with authentication via Clerk.
- Users can upload images and apply advanced AI effects in real-time, with a polished, responsive UI and dynamic credit-based access system.
- Tech Stack: Next.js (App Router), TypeScript, Tailwind CSS, shadcn/ui, Clerk, Cloudinary
- Live Preview
